Engineering Pvt. Ltd.

MATERIALS HANDLING EQUIPMENT

CRANES & WIRE ROPE HOIST

EOT Cranes

“TACKLERS” make overhead traveling cranes manufactured by us include both Single Girder and Double Girder (EOT). These are designed and manufactured in accordance with IS / FEM / ASME.

SINGLE GIRDER OVERHEAD CRANES

1 TON TO 50 TON

- Double Girder Electric Overhead Traveling Cranes
- Single Girder Electric Overhead Traveling Cranes
- Heavy Duty Electric Overhead Traveling Cranes with Main and Auxiliary Hoists - Single & Double Trolley
- Under Slung Cranes

DOUBLE GIRDER OVERHEAD CRANES

1 TON TO 250 TON

GOLIATH / GANTRY CRANES

1 TON TO 200 TON

“TACKLERS” heavy duty Gantry Crane is the ideal material handling equipment for various industries and project like Factories, Power Stations, Large Water Works, Railway yards, harbours, warehouses, yard sites, transporters, mines, heavy fabrication firms etc. It finds numerous application such as loading and unloading, heavy pipe laying in trenches, erection of bulky equipment, shifting of heavy load, pre-cast segment / girder handling etc.

UNDER SLUNG CRANES

0.5 TON TO 25 TON

JIB CRANES 0.5 TON TO 10 TON

“TACKLERS” make Jib Cranes are built to consistently high specification confirming to IS.

COLUMN MOUNTED

PILLAR MOUNTED

WALL TRAVELING

FEATURES

- M. S. Gusset plates / thick base plates giving added rigidity to column.
- Mast fabricated from pipe / rolled steel sections.
- Jib arm fabricated from heavy section I-Beam and triangular truss construction / Plate Fabrication
- Bearing-double roller self aligned, thrust roller bearing to take care of horizontal and vertical loading as well as radial thrust.
- Swivelling through manual chain at the end of Jib arm or Electric (if required)
- Base plate drilled to take holding down bolts.
- Available with 180° and 360° swivelling boom.

Electric Wire Rope Hoists

Load Testing upto 50 Ton

- Complete Electric Wire Rope Hoists
- High Lift Hoists
- Curvature Hoists
- New Generation Hoists
- Flame Proof Hoists
- Fix Suspension Hoists

APPLICATIONS OF HOISTS

Steel Plants, Power Plants, Oil & Gas, Constructions Site, Factories, Ware Houses, Heavy Fabrication Units, Railway Yards, Transporters, Mine Quarries, Harbours, Large Water Works, Marine, Cement, Textile etc.

WIRE ROPE

6 x 36 construction special plough hempcore flexible steel wire rope, having safety factor of 6 for class II and 7 for class III duty, is provided on the hoist Galvanized and other construction of rope can be provided for special application,

MOTOR

Foot mounted squirrel cage induction motor designed and manufactured to IS 325 of reputed make are used, Motors are totally enclosed, half hour rated, eith high starting torque, specially designed and built for hoist duty. The motors suitable for frequent start stop well as braking and are provided with class "F" insulation.

BRAKE

D.C. Disc Brakes are provided for heavy duty operation. Brakes are mounted on the non-driving end of the motor and are easily accessible.

TROLLEY

Cross Travel Trolley is designed to suit either standard Rolled Steel Joist or box girder. The trolley frame is rigidly bolted with hoist frame through series of holes. This also ensures proper adjustments of flange with C.T. Wheels are provided with ball bearing and mounted on EN 8 Steel axles. The motorized trolley units have spur gearbox. Hand geared trolley and push pull trolley are also available.

CONTROLS

Every hoist is provided with a control panel comprising of reputed make heavy duty, direct-on line reversing type air brake contactors, transformer and fuses. All these are housed in dust proof M.S. fabricated sheet metal cabinet. The pendant push button station is provided at adequate height duly suspended by steel chain or wire rope, operation at 24 / 110 volts to avoid accident.

GEARS

Alloy steel hobbled teeth helical spur gears with solid pinions runnings on ball / roller bearing with oil bath lubrication.

PUSH BUTTON STATION

Push Button Switch of reputed make is used. 2 stations (Up and Down) and 4 stations (Up-Down and Left-Right) with start and stop button.

FRAME

Steel fabricated machined and bolted type. The gear box is rigidly aligned with the end load plates by substantially holding the transfer members which also from the motor platform for foot mounted motors.

ROPE DRUM

The rope drum is made of sturdy seamless pipe or fabricated from steel plates and is grooved to take the full lift without overwinding. Large drum diameter to rope diameter ratio reduce wear and cable fatigue. The drum shaft revolves in ball bearing, ensuring smooth running.

ROPE GUIDE

"TACKLERS" hoist carries rope guide and pressure ring as standard feature. Cast iron fully encircling guide is ring fixed around the grooves of the drum to ensure correct rope lay.

RRC (RADIO REMOTE CONTROL):

With the help of a wireless remote control, a Hoist / Crane operator can move freely to operate a crane from a safe distance avoiding hazardous conditions during lifting of heavy loads.

BOTTOM BLOCK

Bottom Block Assembly consisting of drop forged steel hook mounted on thrust Ball Bearings, with large diameter sheave and hook plates made out of steel.

LIMIT SWITCH

To avoid overwinding or overlowering of wire rope, limit switches are provided with each hoist, which ensures the highest and lowest position of load hook.

TECHNICAL PARAMETERS OF HOISTS

CAPACITY		0.25 T	0.5T	1T	1.5T	2T	3T	5T	7.5T	10T	15T	17.5T	20T	25T
